

Zodiac G4®

The ultimate in pool cleaning, designed to give you more time in your pool and less time working on it. The Zodiac G4 harnesses the best in Zodiac nautical know-how, working efficiently and quietly to give you a sparkling clean pool.

- Top of the range cleaner, suitable for most pool surfaces.
- Uses Zodiac's unique Cassette Diaphragm system that is both quiet and easy to clean.
- Balance and stability are features of the Zodiac G4, with the Buoy & Keel working with the Rudder and Sail to ensure the weight distribution is just right to cover most areas of your pool (excluding steps and swim outs).
- The Dual Contact Disc is next generation technology pioneered by Zodiac. A rigid inner support system provides strength and structure for the internal contact pads, which gently pick up and direct fine debris into the cleaner.

Genie® Series II

The exclusive Baracuda diaphragm technology that is on the Genie® Series II, has been helping pool owners keep their pools sparkling clean for many years. Baracuda improved its diaphragm technology by enclosing it in a cassette to facilitate easier removal for maintenance and cleaning. It also improved suction power on the pools surface.

- There are separate systems for concrete & smooth surface pools such as Fibreglass or Tiled, so it is compatible with any in ground pool surface.
- The Genie® Series II has an automatic water flow control and skimming valve that fits any skimmer box.
- The Genie® Series II features the screw in cassette system and a long-life diaphragm made with durable material to pick up all types of debris without constant jamming.

Classic®

The Classic® has all the hallmarks of time-worthy design blended with modern style, ready to win over a new generation. With Baracuda's renowned technological know-how, the Classic® looks every bit as eye-catching as it did when it celebrated its debut.

- The Classic® cleans dirt and debris from both the pool floor and sides.
- The Classic incorporates Baracuda diaphragm technology to quietly and efficiently work in your pool. The fluted disc allows the Classic to move over main drains, lights and other obstacles.
- This cleaner is the value for money choice for concrete surface pools. With minimal parts to service or replace, the Classic will remain a low maintenance cleaning solution for the budget conscious pool owner.

Zoom®

The Zoom® has been developed to meet the special cleaning needs of steel walled, vinyl lined pools*. These pools often don't use large filtering equipment and the Zoom® is lighter and more compact to work efficiently from lower suction. The walls of vinyl lined pools allow debris to fall to the bottom and Zoom® has been designed to concentrate on cleaning this area of the pool.

- The Zoom® has a special disc and foot designed to treat your vinyl surface with care.
- It's easy to install and is compatible with your existing filtration system.
- There are no nuts, gears, screws or corrodible parts to replace.
- The large mouth allows Zoom® to pick up leaves, dirt and sand that other cleaners often leave behind.

*Zoom® has been designed to work with typical above ground pool filtration equipment please consult your local pool shop or builder to ensure Zoom® will work in your pool.

Using leaves and twigs from your skimmer and leaf catcher as garden mulch will conserve water.

Regular checks of your pipes and equipment for cracks will save you water and money.

Pool blankets reduce the effects of losing chlorine and water through evaporation

Only backwash your filter to the point where you see clear water - don't flush away excess water, chemicals and money.
